INDEX TO Vol. I (B).

AUTHORS' INDEX.

Aiyar, R. Gopala .. Early development and metamorphosis of the tropical echinoid *Salmacis bicolor*, Agassiz., 714.

Ayyangar, G. N. Rangaswami, and Nambiar, K. K. K. Studies in *Dolichos lablab* (Roxb.) and (L.).—The Indian field and garden bean, I, 857.

Bhagvat, K., Narayanayya, Y. V., and Subrahmanyan, V. Investigations on the rôle of organic matter in plant nutrition.—Part I. Some chemical aspects of the oxidation of soil organic matter, 49.

Bhargava, H. R. .. Contribution to the morphology of *Mollugo nudicaulis*, Lamk., 271.
Contribution to the morphology of *Eclipta erecta*, Linn., 325.

Bhaskaran, T. R., Narasimhamurthy, G., Subrahmanyan V., and Iyengar, B. A. Sundara .. Investigations on the rôle of organic matter in plant nutrition.—Part IV. Chemical and biological transformations attendant on the application of cane molasses to swamp soil, 155.

Carvalho, J. I. .. *See* Mello and others.

Chaudhuri, H. .. A bacterial disease of wheat in the Punjab, 579.

Choudhri, R. S. .. *See* Singh and Choudhri.

Dastur, J. F. .. Diseases of pan (*Piper Betle*) in the Central Provinces, 778.

Dastur, N. N., Karnad, R. Sastri, B. N., and Venkatasubban, A. Estimation of urea, 817.

Datta, N. C. .. Investigation on metallic contamination of foods, 31.

Ekambaram, T., and Panje, Rama Rao Contributions to our knowledge of *Balanophora*.—I. The morphology and parasitism of the tuber, 452.
Contributions to our knowledge of *Balanophora*.—II. Life-history of *B. dioica*, 522.

Gaitondo', Pundolica .. *See* Mello and others.

Gregory, P. J. .. Cytological studies in safflower (*Carthamus tinctorius*, Linn.), 763.

Gupta, K. M. .. Critical remarks on *Dipterocarpoxylon burmense* Holden: *Irrawadioxylon* Gen. Nov., 549.
A review of the genus *Dipterocarpoxylon* of Holden, with description of a new species *D. Holdeni* from the Irrawady System of Burma, 633.

Iyengar, B. A. Sundara .. *See* Bhaskaran and others.

Iyengar, B. A. Sundara, and Subrahmanyan, V. Investigations on the rôle of organic matter in plant nutrition.—Part VIII. Influence of fermentable organic matter on the transformations of iron in the swamp soil, 868.

Iyengar, N. Keshava .. *See* Sreenivasaya and others.

Iyer, C. R. Harihara, Rajagopalan, R., and Subrahmanyan, V. — Investigations on the rôle of organic matter in plant nutrition.—Part II. Oxidising agents as fertilizers, 106.

Iyer, C. R. Harihara, Siddappa, G. S., and Subrahmanyan, V. — Investigations on the rôle of organic matter in plant nutrition.—Part VI. Effect of injecting minute quantities of certain forms of organic matter on plant growth and reproduction, 381.

Johri, B. M. .. — Studies in the family *Alismaceæ*.—II. *Sagittaria sagittifolia*, L., 340.
The gametophytes of *Berberis nepalensis*, Spreng., 640.

Johri, B. M., and Nand, Sachchida — The development of the male and female gametophytes in *Cuscuta reflexa*, Roxb., 283.

Joshi, P. C. .. — Development of anomalous secondary vascular rings in the root of *Spergula*, L., 729.

Karnad, R. .. — *See* Dastur and others.

Kumar, K. .. — *See* Singh and Kumar.
See Singh and Kumar.
See Singh and Kumar.

Maheshwari, P. .. — Contributions to the morphology of some Indian Liliaceæ. I—The Gametophytes of *Ophiopogon wallichianus*, Hook, f., 197.
Contributions to the morphology of *Ephedra foliata*, Boiss. I—The Development of the male and female gametophytes, 586.

Mello, I. Froilano de .. — Leucocyto-reactions and their value for the diagnosis of syphilis, 133.
A contribution to the study of the blood parasites of some Indian birds, 349.
On two spiral organisms living in the intestinal tract of *Gallinula chloropus* L., 544.
On a toxoplasmid of *Fulica Atra* L., with special reference to a probable sexuality of agametes, 705.

Mello, I. Froilano de, and Raimundo, Macario — Morphology and schizogonic cycle of *Hæmoproteus Raymundi*, N.Sp., Parasite of *Leptocoma zeylanica* (Lin.), 97.

Mello, I. Froilano de, Carvalho, J. I., and Gaitondo', Pundolica — Cytological studies on *Nyctotherus ovalis* with special reference to its morphological types, 249.

Nambiar, K. K. K. .. — *See* Ayyangar and Nambiar.

Nand, Sachchida .. — *See* Johri and Nand.

Narasimhamurthy, G. .. — *See* Bhaskaran and others.

Narasimhamurthy, G., and Subrahmanyan, V. — Investigations on the rôle of organic matter in plant nutrition.—Part VII. Economy of carbon during decomposition of cane molasses in the swamp soil, 823.

Narayanayya, Y. V. .. — *See* Bhagvat and others.

Pandé, S. K. .. On the morphology of *Notothylas levieri* Schiff. Ms., 205.

Notes on the anatomy of a xerophytic fern *Niphobolus adnascens* from the Malay Peninsula, 556.

Panje, Rama Rao .. *See* Ekambaram and Panje.

See Ekambaram and Panje.

Parthasarathy, N. .. *See* Ramiah and others.

Patwardhan, S. S. .. On the structure and mechanism of the gastric mill in decapoda. I—The structure of the gastric mill in *Paratelphusa guerini* (M. Edw.), 183.

On the structure and mechanism of the gastric mill in decapoda. II—A comparative account of the gastric mill in brachyura, 359.

Nematodes from the common wall lizard *Hemidactylus flavoviridis* (Ruppel), 376.

On the structure and mechanism of the gastric mill in decapoda. III—Structure of the gastric mill in anomura, 405.

On the structure and mechanism of the gastric mill in decapoda. IV—The structure of the gastric mill in Reptantous Macrura, 414.

On the structure and mechanism of the gastric mill in decapoda. V—The structure of the gastric mill in Natantous Macrura—Caridea, 693.

Prasannakumar, C. .. *See* Rao and Prasannakumar.

Puri, V. .. A note on the embryo sac and embryo of *Moringa Oleifera* Lamk., 279.

Puri, V., and Singh, Bahadur Studies in the family Amaranthaceæ.—I. The life-history of *Digera arvensis*, Forsk., 893.

Raimundo, Macario .. *See* Mello and Raimundo.

Rajagopalan, R. .. *See* Iyer and others.

Ramanujam, S. .. *See* Ramiah and others.

Ramaswami, L. S. .. Contributions to our knowledge of the cranial morphology of some ranid genera of frogs. Part I, 80.

Ramiah, K., Parthasarathy, N., and Ramanujam, S. A tetraploid plant in wild rice (*Oryza longistaminata*), 565.

Rangaswami, S. .. *See* Sreenivasaya and Rangaswami.

Rao, A. R. .. Notes on the anatomy of some silicified ferns from the cretaceous of Germany, 219.

See Sahni and Rao.

See Sahni and Rao.

Rao, L. Rama, and Prasannakumar, C. On the flints and cherts from the uppermost cretaceous beds (The Niniyur stage) of the Trichinopoly district—S. India, 10.

Rao, R. H. Ramachandra . Mechanism of increase in amylase activity during autolysis of barley powder, 686.

Rao, R. H. Ramachandra, and Subrahmanyan, V. Influence of aeration on the diastatic activity of barley during steeping, 1.

Rao, T. Ramachandra ..	On the spermatogonial divisions in *Aularches miliaris*, L., 19.
Rau, Y. V. Sreenivasa ..	Phosphorus in vegetable proteins. I—The mode of association of phosphorus with the globulins of *Lathyrus sativus* (Khesari) and *Vicia sativa* Var. Angustifolia (Akta), 73.
Reddy, A. Ramakrishna ..	The structure, mechanism and development of the gastric armature in stomatopoda with a discussion as to its evolution in decapoda, 650.
Row, G. R. ..	*See* Sastri and Row.
Sahni, B., and Rao, A. R. .	*Rajmahalia paradoxa*, Gen. et. sp. nov., and other Jurassic plants from the Rajmahal Hills, 258. Further observations on *Rajmahalia paradoxa*, 710.
Sastri, B. N. ..	*See* Dastur and others.
Sastri, B. N., and Row, G. R.	On banana amylase, 318.
Seshachar, B. R. ..	The golgi bodies in the erythrocytes of *Ichthyophis glutinosus*, 519.
Shivapuri, T. N. ..	*See* Singh and Shivapuri.
Siddappa, G. S. ..	*See* Iyer and others.
Siddappa, G. S., and Subrahmanyan, V.	Investigations on the rôle of organic matter in plant nutrition.—Part V. Influence of minute quantities of certain forms of organic matter on the growth of barley, 229. Investigations on the rôle of organic matter in plant nutrition.—Part IX. Oxidation of organic matter and plant assimilation, 928.
Singh, Bahadur ..	*See* Puri and Singh.
Singh, Bahadur, and Shivapuri, T. N.	The gametophytes of *Neptunia oleracea*, Lour., 423.
Singh, B. N., and Choudhri, R. S.	Induced morphological, physiological and chemical variations following seed-exposure to X-radiation in *Nicotiana tabacum*, 435.
Singh, B. N., and Kumar, K.	Photosynthetic behaviour of leaves to variations in temperature, 736. The reactions of the assimilatory system to alterations of light intensity, 754. The influence of partial pressure of carbon dioxide on photosynthetic efficiency, 909.
Singh, B. N., and Tandon, R. K.	Temperature-absorption characteristics during germination in seeds of differing structure and biochemic constitution under varying concentrations of oxygen and water supply, 496.
Singh, B. N., Singh, R. B., and Singh, K.	Investigations into the water requirement of crop plants, 471.
Singh, K. ..	*See* Singh and others.
Singh, R. B. ..	*See* Singh and others.

Sinha, B. B. .. Morphology of a new genus of trematode, family *Aspidogastridæ* Poche, 1907, from the intestine of a tortoise, *Lissemys punctata*, 677.

Sreenivasan, A. .. Investigations on the rôle of silicon in plant nutrition. Part I. On the nature of interaction between soil and soluble silicates, 607.

Sreenivasan, A., and Subrahmanyan, V. Investigations on the rôle of organic matter in plant nutrition.—Part III. Influence of the decomposition of organic matter on soil structure, 123.

Sreenivasaya, M. .. *See* Sreerangachar and Sreenivasaya.

Sreenivasaya, M., and Rangaswami, S. Field studies in the spike-disease of sandal (*Santalum album*, Linn.).—I. Observations on the natural dissemination of spike, 143.

Sreenivasaya, M., Sreerangachar, H. B., and Iyengar, N. Keshava Dilatometric studies in the enzymic hydrolysis of polysaccharides, 43.

Sreerangachar, H. B. .. *See* Sreenivasaya and others.

Sreerangachar, H. B., and Sreenivasaya, M. Dilatometric studies in the enzymic hydrolysis of polysaccharides.—Part II. Hydrolysis of starch by malt diastase, 101.

Subrahmanyan, V. .. *See* Rao and Subrahmanyan.
See Bhagvat and others.
See Iyer and others.
See Sreenivasan and Subrahmanyan.
See Bhaskaran and others.
See Siddappa and Subrahmanyan.
See Iyer and others.
See Narasimhamurthy and Subrahmanyan.
See Iyengar and Subrahmanyan.
See Siddappa and Subrahmanyan.

Subramaniam, M. K. .. The oogenesis of *Salmacis bicolor* (Agassiz.) with a suggestion as to the function of golgi bodies, 291.
Preliminary observations on the effect of fertilization on the golgi bodies in the eggs of *Acentrogobius neilli* (*Gobius neilli*, Day), 571.

Tandon, R. K. .. *See* Singh and Tandon.

Venkatasubban, A. .. *See* Dastur and others.

Verma, S. C. .. Studies on the Indian species of the genus *Echinochasmus*.—Part I., and on an allied new genus *Episthochasmus*, 837.

TITLE INDEX. (B).

Alismaceæ, family, studies, II (Johri), 340.

Amaranthaceæ, family, studies, I (Puri and Singh), 893.

Amylase activity during autolysis of barley, mechanism of increase (Rau), 686.

Anatomy of a xerophytic fern *Niphobolus adnascens* from the Malay Peninsula (Pandé), 556.

Anatomy of some silicified ferns from the cretaceous of Germany (Rao), 219.

Assimilatory system, reactions, alterations of light intensity (Singh and Kumar), 754.

Aularches miliaris, L., spermatogonial divisions (Rao), 19.

Balanophora, contributions to our knowledge, I, II (Ekambaram and Panje), 452, 522.

Banana amylase (Sastri and Row), 318.

Diastatic activity of barley during steeping, influence of aeration (Rau and Subrahmanyan), 1.

Dipterocarpoxylon burmense Holden: *Irrawadioxylon* Gen. Nov., critical remarks (Gupta), 549.

Dipterocarpoxylon of Holden, a review of the genus, with description of a new species *D. Holdeni* from the Irrawady system of Burma (Gupta), 633.

Dolichos lablab (Roxb.) and (L.), studies, I (Ayyangar and Nambiar), 857.

Echinochasmus, genus, Indian species, studies, I (Verma), 837.

Embryo sac and embryo of *Moringa oleifera* Lamk. (Puri), 279.

Enzymic hydrolysis of polysaccharides, dilatometric studies, I (Sreenivasaya and others), 43.

Enzymic hydrolysis of polysaccharides, dilatometric studies, II (Sreerangachar and Sreenivasaya), 101.

Flints and cherts from the uppermost cretaceous beds (the Niniyur stage) of the Trichinopoly district—S. India (Rao and Prasannakumar), 10.

Gametophytes, male and female, development, in *Cuscuta reflexa,* Roxb. (Johri and Nand), 283.

Gametophytes of *Berberis nepalensis,* Spreng. (Johri), 640.

Gametophytes of *Neptunia oleracea,* Lour. (Singh and Shivapuri), 423.

Gastric armature in stomatopoda, structure, mechanism and development, with a discussion as to its evolution in decapoda (Reddy), 650.

Gastric mill in decapoda, structure and mechanism, I, II, III, IV, V (Patwardhan), 183, 359, 405, 414, 693.

Golgi bodies in the eggs of *Acentrogobius neilli* (*Gobius neilli,* Day), preliminary observations on the effect of fertilisation (Subramaniam), 571.

Golgi bodies in the erythrocytes of *Ichthyophis glutinosus* (Seshachar), 519.

Leucocyto-reactions and their value for the diagnosis of syphilis (Mello), 133.

Metallic contamination of foods, investigation (Datta), 31.

Morphology and schizogonic cycle of *Hæmoproteus Raymundi,* N. Sp., parasite of *Leptocoma zeylanica* (Lin.) (Mello and Raimundo), 97.

Morphology, a new genus of trematode, family *Aspidogastridæ*, Poche, 1907, from the intestine of a tortoise, *Lissemys punctata* (Sinha), 677.

Morphology, cranial, some ranid genera of frogs, contributions to our knowledge, I (Ramaswami), 80.

Morphology, *Eclipta erecta*, Linn., contribution (Bhargava), 325.

Morphology, *Ephedra foliata*, Boiss., I, contributions (Maheshwari), 586.

Morphology, *Mollugo nudicaulis*, Lamk., contribution (Bhargava), 271.

Morphology, *Notothylas levieri*, Schiff. Ms. (Pandé), 205.

Morphology, some Indian liliaceæ, contributions, I (Maheshwari), 197.

Nematodes from the common wall lizard *Hemidactylus flavoviridis* (Ruppel) (Patwardhan), 376.

Nyctotherus ovalis, cytological studies, with special reference to its morphological types (Mello and others), 249.

Oogenesis of *Salmacis bicolor* (Agassiz) with a suggestion as to the function of golgi bodies (Subramaniam), 291.

Organisms, spiral, two, living in the intestinal tract of *Gallinula chloropus*, L. (Mello), 544.

Pan (*Piper betle*), diseases, Central Provinces (Dastur), 778.

Parasites, blood, some Indian birds, contribution to the study (Mello), 349.

Phosphorus in vegetable proteins, I (Rau), 73.

Photosynthetic behaviour of leaves to variations in temperature (Singh and Kumar), 736.

Photosynthetic efficiency, influence of partial pressure of carbon dioxide (Singh and Kumar), 909.

Plant nutrition, investigations on the rôle of organic matter, I (Bhagvat and others), 49.

Plant nutrition, investigations on the rôle of organic matter, II (Iyer and others), 106.

Plant nutrition, investigations on the rôle of organic matter, III (Sreenivasan and Subrahmanyan), 123.

Plant nutrition, investigations on the rôle of organic matter, IV (Bhaskaran and others), 155.

Plant nutrition, investigations on the rôle of organic matter, V (Siddappa and Subrahmanyan), 229.

Plant nutrition, investigations on the rôle of organic matter, VI (Iyer and others), 381.

Plant nutrition, investigations on the rôle of organic matter, VII (Narasimhamurthy and Subrahmanyan), 823.

Plant nutrition, investigations on the rôle of organic matter, VIII (Iyengar and Subrahmanyan), 868.

Plant nutrition, investigations on the rôle of organic matter, IX (Siddappa and Subrahmanyan), 928.

Plant nutrition, investigations on the rôle of silicon (Sreenivasan), 607.

Rajmahalia paradoxa, further observations (Sahni and Rao), 710.

Rajmahalia paradoxa, Gen. et sp. nov. and other Jurassic plants from the Rajmahal Hills (Sahni and Rao), 258.

Safflower (*Carthamus tinctorius*, Linn.), cytological studies (Gregory), 763.

Salmacis bicolor, tropical echinoid, Agassiz, early development and metamorphosis (Aiyar), 714.

Schizogonic cycle, morphology, *Hæmoproteus Raymundi*, N. Sp., parasite of *Leptocoma zeylanica* (Lin.) (Mello and Raimundo), 97.

Spergula, L., root, development of anomalous secondary vascular rings (Joshi), 729.

Spike-disease of sandal (*Santalum album*, Linn.), field studies, I (Sreenivasaya and Rangaswami), 143.

Temperature-absorption characteristics during germination in seeds of differing structure and biochemic constitution under varying concentrations of oxygen and water supply (Singh and Tandon), 496.

Tetraploid plant in wild rice (*Oryza longistaminata*) (Ramiah and others), 565.

Toxoplasmid of *Fulica atra*, L., with special reference to a probable sexuality of agametes (Mello), 705.

Urea, estimation (Dastur and others), 817.

Water requirements of crop plants, investigations (Singh and others), 471.

Wheat in the Punjab, bacterial disease (Chaudhuri), 579.

X-radiation in *Nicotiana tabacum*, induced morphological, physiological and chemical variations following seed-exposure (Singh and Choudhri), 435.
